The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject matter of claims 9 and 24 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-10, 12-25, and 27-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art in view of Jackson et al (US 6139243).

The admitted prior art discussed on pages 2-5 of the specification discloses substantially all the claimed features. Jackson et al discloses another similar apparatus in which the claimed inverting mechanism is disclosed. It would have been obvious to a person having ordinary skill in the art to provide the admitted prior art apparatus with an inverting mechanism as taught by Jackson et al to invert the devices. The picker and slider are old and well known in the art and the provision of such to the admitted prior art apparatus would have been obvious to a person having ordinary skill in the art to
